

UPS Distribution Panel - Single Line Diagram

Document No.:	LIB-ELE-0010
Revision:	0
Discipline:	Electrical
Document Type:	Drawing
Date:	2026-05-28
Project:	FPSO Liberty Development

Description

This single line diagram shows the distribution arrangement downstream of the uninterruptible power supply serving the control room, DCS cabinets, and emergency lighting circuits.

Battery autonomy is designed for 30 minutes at full rated load. Changeover to the emergency generator supply is automatic on loss of normal power, per the electrical load flow study.
