

Vibration Monitoring System - Datasheet

Document No.:	LIB-INS-0015
Revision:	B
Discipline:	Instrumentation
Document Type:	Datasheet
Date:	2026-06-30
Project:	FPSO Liberty Development

Description

This datasheet defines the vibration monitoring transducer specification and alarm philosophy for the main export compressor train, including proximity probe and casing accelerometer requirements.

Alarm and trip setpoints shall be configured in accordance with the machinery vendor's API 670 compliant recommendations prior to first start-up.
